

4225 - SPECIFICATION FOR MOVING WITHIN SEAL COAT CONTRACT

4225 - 1 DESCRIPTION

- 1.01 The work shall consist of the movement of personnel, equipment, supplies and incidentals from project to project within the contract.

4225 - 2 MATERIALS

4225 - 3 CONSTRUCTION

- 3.01 The Contractor shall do the necessary preparatory work and operations, including but not limited to, those required for the movement of personnel, equipment, supplies and incidentals from project to project.

4225 - 4 MEASUREMENT

- 4.01 The Bid Item quantity is based on the accumulated distance measured along a route using the numbered highway system, from the centre of one project to the centre of the next project, as contained in the order of work in the Special Provisions.
- 4.02 This item does not cover moves within a project.
- 4.03 Should the Engineer direct that this order of work be changed, a new accumulated distance will be calculated. The Contract Unit Price will apply for any revised distance, whether an increase or decrease from the estimated contract quantity.
- 4.04 The measurement between project moves may not be exact and will be remeasured. Should the remeasurement of the distance between moves result in a changed value, the total kilometres of move will be adjusted accordingly.

4225 - 5 PAYMENT

- 5.01 Payment for MOVING WITHIN CONTRACT will be at the Contract Unit Price per kilometre. The unit price will be full compensation for movement of the total "plant", personnel, equipment, supplies and incidentals.
