

**SASKATCHEWAN
COMMUNITY WATER USE RECORDS
2015 to 2024
REPORT NO. 38**

Part 1: Communities and Reserves

Prepared and submitted by:
THE WATER SECURITY AGENCY
Regulatory Division
111 Fairford Street East
Moose Jaw, Saskatchewan S6H 7X9

August 2025

Disclaimer Notice:

The data presented is provided by the various communities listed in this report. While every effort is made to ensure that the content of this report is accurate, the report is provided “as is” and The Water Security Agency (“WSA”) makes no representations or warranties in relation to the accuracy or completeness of the information found on it.

Nothing in this report should be taken to constitute professional advice or a formal recommendation and WSA excludes all representations and warranties relating to the content and use of this report.

In no event will WSA be liable for any direct or incidental, indirect, consequential or special damages of any kind, or any damages whatsoever, including, without limitation, those resulting from loss of profit, loss of contracts, goodwill, data, information, income, anticipated savings or business relationships, whether or not advised of the possibility of such damage, arising out of or in connection with the use of this report.

INTRODUCTION

This document contains water consumption data for the majority of Saskatchewan municipalities from 2015 to 2024. The information includes Saskatchewan Ministry of Health population statistics, monthly, yearly, average day, peak day and per-capita water consumption as well as peak day factors. For 2024, WSA obtained water consumption records from 493 communities. While 2024 data for most of the First Nations was not available, WSA did obtain a significant set of records for 2017 through 2023. This document will be updated on an annual basis.

The report is intended to serve a variety of interests. For this year, the report is divided into two sections. Communities and First Nation Reserves comprise Part 1, which is publicly available. Part 2 includes Parks, Pipelines, and Private Entities and is only available within WSA.

Where community water usage records do not exist or data as received appears to be erroneous, the average water demands of between 230 and 450 litres/capita/day (LCD) could be used. Comments on questionable and/or missing data are included in Appendices A and B. The provincial weighted average and provincial average as shown are based on communities having water consumption in the range of 130 to 750 LCD.

It should be noted that the litres/capita/day (LCD) for some communities such as Resort Villages and First Nations may be misleading because the population may not reflect the actual users. It should also be noted that the peak day water consumption shown for each community (one-day occurrence in a year) is for information only and may be used for design purposes with caution. Sometimes this peak day water consumption data could be exaggerated due to a water main break, fire demand or other problem with the treatment or distribution system.

When communities report their peak day consumptions, occasionally questionable data is reported; this can be due to various reasons. For example, some communities may have more

than one water meter. Other communities do not monitor their daily consumption. Such examples illustrate why peak day consumptions to be used in design purposes should be used with caution, as questions can be raised as to where the peak day data originates. In the case where questionable peak day data exists, the table located below has been provided for reference.

Further to this, some communities continue to report very low peak day consumptions. The reason for this low reporting has not yet been discovered. For this reason, some low peak day factors may still be found within this document but these data remain questionable.

For design purposes, water supply and treatment facilities serving municipalities with a population under 10,000, the peak day demand may be taken as two to three times the average rate. A peak hour factor of three to four would apply for distribution pumps. The table on the following page may be utilized for peaking factors for various sized communities.

The water type (R/T/U for Raw/Treated/Unknown) shown in this report next to the year for each record, indicates the type of water measured for that year. The population statistics for First Nations from 1998 onward have been provided by the Saskatchewan Ministry of Health where the statistics are available. A zero (0) does not necessarily indicate that no water was consumed, but that water records may not have been available.

RECOMMENDED PEAKING FACTORS FOR MUNICIPAL WATER SUPPLY SYSTEMS		
Population Range	Peak Day Factor (For Supply and Treatment)	Peak Hour Factor (For Distribution)
Up to 500	3.00	4.50
501 - 1,000	2.75	4.13
1,001 - 2,000	2.50	3.75
2,001 - 3,000	2.25	3.38
3,001 - 10,000	2.00	3.00
10,001 - 25,000	1.90	2.85
25,001 - 50,000	1.80	2.70
50,001 - 75,000	1.75	2.62
75,001 - 150,000	1.65	2.48
Greater than 150,000	1.50	2.25

PROVINCIAL AVERAGES			
Litres/Capita/Day (LCD) between 130-750			
Year	LCD ¹	Weighted LCD ²	Communities used in Average
2024	257	316	354
2023	266	308	339
2022	260	323	338
2021	270	338	298
2020	262	328	322
2019	262	341	335
2018	269	356	353
2017	276	375	340
2016	268	343	339
2015	293	367	388

¹The LCD (litres/capita/day) is computed by summing the LCD for each community and dividing by the number of communities and 365 (days).

²The Weighted LCD (litres/capita/day) is computed by summing the yearly water consumption for each community and dividing by the total population and 365 (days).

Aberdeen	2015 Forward:	Water and data supplied by SaskWater (starting in April 2010).
Abernethy	2024 2023 2017	Monthly values based on treated proportions. Excludes truck fill usage. Well meter not working.
Alida	2022 2021	Peak Day from a water leak in December. New Meter in June
Alvena	2019	Reported January usage was 9.1 m3.
Arran	2023	Peak day due to water leak.
Assiniboia	2015 Forward:	Wood River line usage has been deducted.
Balgonie	2022 Forward:	Excludes water sent to Edenwold.
Battleford	2017 2015	Excludes water provided to North Battleford after N. Sask River oil spill. Peak day estimated.
Beauval	2018	WTP upgrades in March.
Belle Plaine	2019	Household leak in March.
Bellegarde	2023	Line break in April.
Bell's Point Reserve #156	2015 Forward:	Data supplied by SaskWater.
Bengough	2020	New RO system in October.
Bienfait	2024 2020	No explanation for high July use. New meter in October.
Big Beaver	2018 2015	Water line break in May Meter failed in August; new meter in September.
Big Island Lake Reserve #124	2015 Forward:	Data supplied by SaskWater.
Big River	2020	Switched wells Nov. 18.
Big River Reserve #118	2021 2015 Forward:	No data January - May; values from 6-month total. Data supplied by SaskWater. Water is used to flood arena. Backwash not metered through truck fill.
Biggar	2018 2016	Peak day volume estimated. Peak day volume estimated.

Community	Year	Comment
Birch Lake Reserve #159A	2015 Forward:	Backwash not metered through truck fill (no data)
Birsay	2018	Jan. estimated from Treated volume.
Blaine Lake	2021	Switched to new wells in August.
Blaine Lake	2022	Jan – Sept usage estimated from Treated report.
Brabant Lake	2023	Jan - April estimated.
Brancepeth	2023	Monthly estimated from annual total.
Bredenbury	2023	Raw meter malfunctioned; Treated values used.
Broderick	2020	Counted as draw from supply to storage so some months very low.
	2015	Low usage not explained.
Buchanan	2016	Data reported bimonthly.
Buena Vista	2019	Peak Day is Treated.
Bulyea	2018	Meters failed in July.
Calder	2015	Jan to Oct usage is inaccurate due to filter bypassing.
Canora	2021	Peak day estimated from Treated.
	2015 Forward:	Excludes CRPUB usage.
Carlyle	2024	Jan. value estimated by WSA.
Carmichael	2023	Meter change in May.
Carnduff	2023	Leaks, new RO system in Feb.
Caronport	2020	New meter in December.
Carrot River	2022	Peak Day value estimated from Treated report.
	2021	Meter problems May through November.
	2019	Peak Day is Treated.
Chicken Reserve #224	2022	Based on 2023 ratios
	2021	No data February - July; values from 6-month total.
	2015 Forward:	Data supplied by SaskWater. Truck fill is not used. Water is used to make ice in the arena.

Community	Year	Comment
Chitek Lake Reserve #191	2021	South Core meter readings not availableJanuary - May.
	2020	South Core meter readings not available April - August.
	2018	North core only.
Churchbridge	2022	Switched to RO treatment in May.
	2015	Leaks in November, December.
Codette	2015 Forward:	Data supplied by SaskWater.
Colgate	2015	Water leaks in February and July.
Colonsay	2018	Meter changed in September.
Conquest	2023	Switched to new well November.
Consul	2023	New metering in June.
	2022	Meter broke in Jan. on new well.
Corning	2018	Water line frozen Feb – May.
Cowessess Reserve #73	2015 Forward:	Data supplied by SaskWater.
Craik	2024	Meter data unavailable for January.
	2015	All measures estimated.
Creighton	2022	Meter change in May.
	2019	Meter error March - May.
Crystal Springs	2023	Peak day value due to a leak.
Cudworth	2015 Forward:	Usage data from SaskWater.
Cumberland House Indian Reserve	2022	Records show very inconsistent usage.
	2021	Partial records missing for Nov-Dec.
	2020	Records show very inconsistent usage.
	2019	Records show very inconsistent usage.
	2018	Records show very inconsistent usage.
	2015 Forward:	Data supplied by SaskWater. Truck fill is not used. Total consumption includes Main Plant and RO Plant.
Cupar	2019	Line break on Peak Day
	2015 Forward:	Data and Water supplied by SaskWater.
Cut Knife	2024	New well collapsed in June.
	2023	Pump issues first half of year.

Community	Year	Comment
Dalmeny	2016	Peak day estimated.
	2015 Forward:	Usage data from SaskWater.
Daystar Reserve #87	2015 Forward:	Some water is provided to livestock.
Debden	2020	New meter in April.
Deer Valley	2016	Estimated: 8.8% of total Lumsden usage.
Denare Beach	2023	Meter problems July through September.
Disley	2015 Forward:	Usage data from SaskWater.
Dodsland	2022	Faulty meter on Well #3.
Domremy	2015 Forward:	Usage data from SaskWater.
Dore Lake	2019	No data for Jan. to Mar.
Dubuc	2024	Meter failed mid-April, repaired late August.
	2018	Line break in January.
Duck Lake	2024	Raw values(incomplete) estimated from Treated
	2019	Peak Day from Treated.
Duff	2024	Meter failed in June.
Dundurn	2021	Meter problems in March, July, and September.
	2015 Forward:	Water supplied by Saskatoon via SaskWater.
Duval	2024	Meter problems throughout year.
	2015	High Oct. usage not explained.
Eastend	2023	Includes tankload use of 4,924 m3.
Englefeld	2020	January use estimated from Treated.
Esterhazy	2024	Meter stuck in October.
Eston	2022	Meter problems throughout the year.
Eston	2015 Forward:	Estimated as 18% of Eston-Kindersley total usage, total of 4 wells NOT including shield wells.
Evesham	2021	New pump in June.
Eyebrow	2016	Meter was changed; numbers don't conform to units.

Community	Year	Comment
Fairholme	2024	Meter replaced in January.
	2023	Meter failed in December; volume estimated.
Fenwood	2024	Meter changed in May. Jan - April values multiplied by 10.
	2023	Estimated from 2022 - 2024 difference.
	2022	Reported values multiplied by 10 to comport with earlier records.
	2020	Reported values multiplied by 10 to comport with earlier records.
	2015	Meter replaced in October.
Fond Du Lac Reserve #227	2017	Meters began failing in February; failed completely at year-end.
	2015 Forward:	Data supplied by SaskWater.
Frobisher	2021	New meter in May.
Fulda	2016	Water leak in December.
Gladmar	2018	New meter in March.
Goodsoil	2023	Meter failed in November.
