

Appendix A is intended to provide general guidance for the acceptable use of federally registered herbicides providing control of the target weed. It is the responsibility of the applicant to ensure herbicide treatment is made using eligible herbicides and rates, applied according to the product label and is appropriate for their specific situation. Applications that deviate from the product label may result in the claim being considered ineligible. The Saskatchewan Ministry of Agriculture is not responsible for the consequences of herbicide application. Always read and follow herbicide label directions.

Industrial herbicides are only for use on industrial sites such as rights of way (road, pipeline, rail), non-irrigated ditch banks, well sites, yard sites, etc. and may not be used in range or pasture land unless indicated.

Range and pasture use herbicides are only to be used on agricultural land and may not be used on industrial sites unless indicated.

If you have any questions, contact the Ministry of Agriculture Provincial Weed Control Specialist at 306-787-4673.

In Saskatchewan, *The Pest Control Products (Saskatchewan) Act* requires any person purchasing and applying federally registered pesticides for hire or reward, to hold a valid Pesticide Applicator Licence and have or be listed on a Pesticide Service Licence.

Include copies of valid Pesticide Applicator Licence and Pesticide Service Licence, when applicable.

- All third-party pesticide applicators are required to have or be listed on a service licence when being paid for performing the service along with a pesticide applicator licence.
- Rural municipality employees are exempt from only the service licence requirement as part of the rural municipalities exemption under the Act.
- Agriculture producers applying herbicides on their own land are exempt from requiring a pesticide applicator licence if applying to their own land (owned or rented).
- For each individual, copies of licences will be verified for dates and categories allowable under the IPCP: Service, Industrial, Agricultural, Aquatic, Landscape and Aerial.
- Visit the Ministry of Agriculture Pesticide Licensing Program.

Prohibited Weeds

Prohibited weeds are either not currently in Saskatchewan or are only recently introduced and very rare. For this reason, prohibited weeds may not have registered control options developed in Canada yet. **Herbicide applicators (including producers and other applicants) must apply only eligible herbicide options listed in the current Appendix A to Prohibited Weed Species where they are provided.** If there are no herbicide options listed in Appendix A for application to the Prohibited Weed species of interest, the applicator must consult with the Provincial Weed Control Specialist prior to any application to determine a suitable herbicide option based on registrations or extension recommendations from the United States.

The herbicide option selected must be applied in accordance with Canadian labelled use patterns. Failure to consult will risk the claim being ineligible for rebate. ***NOTE - Applicants will be required to submit a copy of the email sent by the Provincial Weed Control Specialist as confirmation of consultation on prohibited weeds and recommendation of the alternative herbicide used.***

The management/enforcement goal for prohibited weeds is to eradicate.

In accordance with The Weed Control Act, municipalities are required to notify Crops and Irrigation Branch upon the discovery of a prohibited weed and at that time an appropriate control option will be investigated and approved. For control options for Prohibited Weeds or assistance in confirming identification, please contact Cory Jacob, Provincial Weed Control Specialist at 306-787-4673 or cory.jacob@gov.sk.ca.

The order of appearance of these products in the following list does not constitute a preference of the use of one product over the other. The products are listed alphabetically. Please select the most appropriate product for the weeds and area being treated.

Table 1. List of Prohibited Weeds in Saskatchewan

Common Name	Botanical Name
African rue	<i>Peganum harmala</i> L.
common barberry	<i>Berberis vulgaris</i> L.,
common crupina	<i>Crupina vulgaris</i> Cass.
curly-leaved pondweed	<i>Potamogeton crispus</i> L.
dalmatian toadflax	<i>Linaria dalmatica</i>
darnel	<i>Lolium temulentum</i> L.
Eurasian water-milfoil	<i>Myriophyllum spicatum</i> L.
field scabious	<i>Knautia arvensis</i> (L.) Coult.
flowering rush	<i>Butomus umbellatus</i> L.
garlic mustard	<i>Allaria petiolata</i> (M. Bieb.) Cavara & Grande
giant foxtail	<i>Setaria faberi</i> Herm.
giant hogweed	<i>Heracleum mantegazzianum</i> Sommier & Levier
halogeton	<i>Halogeton glomeratus</i> (M. Bieb.) C.A. Mey.
hound's-tongue	<i>Cynoglossum officinale</i> L.
jointed goatgrass	<i>Aegilops cylindrical</i> Host
knapweed, diffuse	<i>Centaurea diffusa</i> Lam.
knapweed, spotted	<i>Centaurea stobe</i> L.(= <i>Centaurea biebersteinii</i> DC)
knapweed, squarrose	<i>Centaurea virgata</i> Lam.
perennial pepperweed	<i>Lepidium latifolium</i> L.
poison hemlock	<i>Conium maculatum</i> L.
puncturevine	<i>Tribulus terrestris</i> L.
red bartsia	<i>Odontites serotina</i> Dum.
saltcedar	<i>Tamarix</i> sp
wild chervil	<i>Anthriscus sylvestris</i> (L.) Hoffm.
woolly cupgrass	<i>Eriochloa villosa</i> (Thunb.) Kunth
yellow floating heart	<i>Nymphoides peltata</i> (S.G. Gmel.) Kuntze
yellow star-thistle	<i>Centaurea solstitialis</i> L.

New Prohibited Weeds	
crown vetch	<i>Securigera veria</i> (L.) Lassen
Dyer's woad	<i>Isatis tinctoria</i> L.
European common reed	<i>Phragmites australis</i> (Cav.) Trin. ex Steud. ssp. <i>australis</i>
Himalayan balsam	<i>Impatiens glandulifera</i> Royle
Japanese knotweed	<i>Polygonum cuspidatum</i> Siebold & Zucc.
Medusahead	<i>Taeniatherum caput-medusae</i> (L.) Nevski
North Africa grass	<i>Ventenata dubia</i> (Leers) Coss.
Palmer amaranth	<i>Amaranthus palmeri</i> S. Watson
Paterson's curse	<i>Echium plantagineum</i> L.
Vipers bugloss/blueweed	<i>Echium vulgare</i> L.
giant knotweed	<i>Polygonum sachalinense</i> F. Schmidt ex Maxim
hawkweed, meadow	<i>Hieracium caespitosum</i> Dumort
hawkweed, orange	<i>Hieracium aurantiacum</i> L.
knapweed, bighead	<i>Centaurea macrocephala</i> Puschk. ex Willd
knapweed, brownray	<i>Centaurea jacea</i> L.
plumeless thistle	<i>Carduus acanthoides</i> L.
teasels	<i>Dipsacus</i> spp.
waterhemp	<i>Amaranthus tuberculatus</i> (Moq.) Sauer

Table 2. Prohibited Weeds - Eligible Herbicides

Common Name	Eligible Herbicide
common crupina	Navius Flex
	TruRange (range and pasture areas only)
diffuse knapweed	Clearview
	Milestone
	Navius Flex
	Reclaim II (range and pasture areas only)
	Tordon 22K
	TruRange (range and pasture areas only)
field scabious	Clearview
	Reclaim II (range and pasture areas only)

giant foxtail	Arsenal Powerline (<i>bare ground treatments only</i>)
	Esplanade (<i>bare ground treatments only</i>)
giant hogweed	Navius Flex
	TruRange (<i>range and pasture areas only</i>)
perennial pepperweed	Clearview
	Reclaim II (<i>range and pasture areas only</i>)
spotted knapweed	Clearview
	Milestone
	Navius Flex
	Reclaim II (<i>range and pasture areas only</i>)
	Restore II (<i>range and pasture areas only</i>)
	Tordon 22K
yellow star-thistle	TruRange (<i>range and pasture areas only</i>)
	Clearview
	Esplanade (<i>bare ground treatments only</i>)
	Milestone
	Navius Flex
	Reclaim II (<i>range and pasture areas only</i>)
	Restore II (<i>range and pasture areas only</i>)
	Restore NXT (<i>range and pasture areas only</i>)
	TruRange (<i>range and pasture areas only</i>)

New Prohibited Weeds	
Japanese knotweed	Clearview
Medusahead	Esplanade SC (<i>bare ground treatments only</i>)
orange hawkweed	Navius Flex
	TruRange (<i>range and pasture areas only</i>)
	Clearview
	Milestone
	Restore NXT (<i>range and pasture areas only</i>)
plumeless thistle	Restore NXT (<i>range and pasture areas only</i>)

Noxious Weeds

Noxious weeds are established regionally in Saskatchewan beyond the point of practical eradication (some areas are still free from these weeds). They are also known to be aggressive in Saskatchewan or other surrounding provinces or states.

The management/enforcement goal for noxious weeds is to eradicate small, isolated infestations found in previously uninfested areas as soon as they can be found and to control larger established infestations to prevent spread and to reduce overall impact on the landscapes they infest.

Table 3. List of Eligible Noxious Weeds

Common Name	Botanical Name
absinthe	<i>Artemisium absinthum</i> L.
baby's-breath	<i>Gypsophila paniculata</i> L.
black henbane	<i>Hyoscyamus niger</i> L.
bladder campion	<i>Silene vulgaris</i> (Moench) Garcke
common burdock	<i>Arctium minus</i> Bernh. Subsp. <i>minus</i>
common tansy	<i>Tanacetum vulgare</i> L.
downy brome	<i>Bromus tectorum</i> L.
field bindweed	<i>Convolvulus arvensis</i> L.
hoary alyssum	<i>Beretoa incana</i> (L.) DC.
hoary cress	<i>Cardaria</i> spp. (L.) Desv.
hound's tongue	<i>Cynoglossum officinale</i> L.
Japanese brome	<i>Bromus japonicus</i> Thunb.
leafy spurge	<i>Euphorbia esula</i> L.
ox-eye daisy	<i>Leucanthemum vulgare</i> Lam.
Russian knapweed	<i>Acroptilon repens</i> (L.) DC. (= <i>Centaurea repens</i> L.)
scentless chamomile	<i>Matricaria perforata</i> Mérat (= <i>Tripleurospermum perforatum</i> (Mérat) M. Lainz)
white cockle	<i>Silene alba</i> (Mill.) E.H. L. Krause
wild parsnip	<i>Pastinaca sativa</i> L.
yellow toadflax	<i>Linaria vulgaris</i> Mill.

Table 4. Noxious Weeds Eligible Herbicides

Common Name	Eligible Herbicide
absinthe	Clearview
	Milestone
	Reclaim II (<i>range and pasture areas only</i>)
	Restore II (<i>range and pasture areas only</i>)
	Restore NXT (<i>range and pasture areas only</i>)
baby's-breath	Clearview
	Dicamba (<i>Disha 480 and Oracle only</i>)
	Reclaim II (<i>range and pasture areas only</i>)
	Vanquish (<i>industrial areas only</i>)
black henbane	Clearview
	Reclaim II (<i>range and pasture areas only</i>)
bladder campion	Arsenal Powerline (<i>bare ground treatments only</i>)
common burdock	Arsenal Powerline (<i>bare ground treatments only</i>)
	Aspect (<i>industrial areas only</i>)
	Grazon XC (<i>range, pasture, and non-cropland areas</i>)
	Reclaim II (<i>range and pasture areas only</i>)
	Restore II (<i>range and pasture areas only</i>)
common tansy	Clearview
	Escort (<i>up to early bud stage and perennial grass areas only</i>)
	Milestone
	Navius Flex
	Reclaim II (<i>range and pasture areas only</i>)
	Restore NXT (<i>range and pasture areas only</i>)
	TruRange (<i>range and pasture areas only</i>)
downy brome	Rejuvra (<i>range and pasture only</i>)
field bindweed	Arsenal Powerline (<i>bare ground treatments only</i>)
	Dicamba
	Esplanade (<i>bare ground treatments only</i>)
	Restore II (<i>range and pasture areas only</i>)
	Tordon 22K
