

9.10 Release Notes

IRIS Version 9.10

Release Date: October 4, 2023

9.10 Release Notes Publication Date	Notes and Changes Made
October 4, 2023	Initial Release

About

IRIS Version 9.10 Release implemented 34 items. In addition to the changes detailed below, various enhancements and fixes to known defects were implemented to various IRIS Modules.

What's changed?

The highlights of what has changed in IRIS Version 9.10 release are noted below.

Note: Whether a user has access to the functionality or enhancements outlined in these *9.10 Release Notes* depends on the individual's security access and assigned permissions sets.

Infrastructure Functionality

- The *Pipeline Segment Data Amendment Application* validation that compares the 'From and To LSD Location' that is currently in IRIS has been updated to derive the 'From and To LSD Location' from that application's shapefile or coordinates. This will remove the unhandled error that was previously preventing Industry users from submitting the application.

If no 'From and To LSD Location' has been derived (from the shapefile or coordinates) within the *Pipeline Segment Data Amendment Application*, the system will create the following warning message upon selecting "Next" but will allow the user to proceed with the application.

- *The segment you chose may be on the border of two Legal Land Descriptions, which may result in null values displayed in IRIS for From/To Legal Land Description. Please contact the ER Service Desk with the Legal Land Descriptions you want to display.*

Lastly, if a new shapefile has been provided via the *Segment Spatial Data* tab and subsequently removed, the system shall revert the segment LSDs ('From LSD' and 'To LSD' fields) to their original values in the *Segment Information* tab of the *Pipeline Segment Data Amendment Application*.

- On the Casings tab of the Well Details screen the requirements have been updated to require the *Casing Set Date* when adding or editing the Surface Casing information.
- The Injection/Production Satellites' *Inactive Liability classification* has been improved to prevent incorrect assessment of Inactive Liability. The Inactive Liability is used to calculate *Annual Reduction Target (ART)* as part of the *Inactive Liability Reduction Program (ILRP)*. With these changes to Injection/Production Satellite's *Inactive Liability Classification*, some Licensees will notice a decrease on their ARTs moving forward.
- The Ministry of Agriculture Regions have been updated in IRIS to align with recent Ministry of Agriculture Region changes. These changes are only go-forward and historical regions that were assigned at the time of licensing will remain the same. At this time users will be unable to search for the historical Ministry of Agriculture Regions through the Advanced Search functionality for Ministry of Agriculture Regions.

Petroleum Tenure Module

- The *PT Builders' Lien Discharged* functionality has a new Industry notification. This notification is designed to advise Disposition Holders when an existing registered Builder's Lien against their disposition is discharged.
 - To receive this notification, Industry users must have the new permission set *I.PETT.Application.DischargeInstrument.Notification* assigned to their user and they must subscribe to the Notification type of *PT Builders' Lien Discharged*.

Energy and Resources Training Modules

Online Training courses for Integrated Resources Information System (IRIS) can be found [here](#).

Security and Permission Sets

The following changes were made to the following IRIS permission sets.

****Note:** If a user is already assigned to the below permission set, they will automatically receive access to the new function.

Industry

Permission Sets **		
Permission Sets ADDED **	Permissions	Function
I.PETT.Application.DischargeInstrument.Notification	<ul style="list-style-type: none"> • Notification.User.Preferences.Maintain • Notification.View • PT.Base • PT.DHOA.View • PT.Disposition.GroupingsTab.View • PT.Disposition.ReadOnly • PT.Disposition.View • PT.DispositionGrouping.View • PT.Instrument.View • PT.LeaseContinuanceFinal.BatchSchedule.View • PT.LeaseContinuancePreliminary.BatchSchedule.View • PT.Notification.PTBUIILLIENDIS.Receive 	Subscribe/unsubscribe to the 'PT Builders Lien Discharged' notification type.
