Overview of Travel and Objectives

The Global Energy Show Canada (GES) is the largest 828 exhibition and conference, engaging with industry buyers and sellers, stakeholders and partners, Chief Executive Officers and young professionals to share knowledge and fuel innovation in the ever-changing energy landscape.

GES is inclusive to all energy systems, including oil, hydrogen, wind, solar, petrochemicals, gas and liquified natural gas, electrification and nuclear. As no single source of energy can meet the increased global energy demand, the GES is where Canada demonstrates its vision and leadership by bringing the right people together to meet global challenges with real-world solutions.

The objective of the Minister's attendance at the GES was to promote Saskatchewan's leadership in the carbon capture, utilization and storage, critical mineral resource development and investment opportunities tied to these activities, including carbon dioxide for enhanced oil recovery and Saskatchewan's unique incentive programs.

Travel Activity

While at the Global Energy Show, Minister Reiter delivered opening remarks on behalf of Premier Scott Moe and he also spoke on behalf of the Premier at the Strategic Conference Program. He also attended bilateral meetings with various stakeholders.
