

## 9.23.1 Release Notes

### Incident Reporting Enhancement Project

**Release Date:** January 21, 2026

9.23.1 Release Notes Publication Date	Notes and Changes Made
January 21, 2026	Initial Release

#### About

On January 21, 2026, Saskatchewan’s Ministry of Energy and Resources (ER) implemented the Incident Reporting Enhancement project into the Integrated Resource Information System (IRIS).

The Incident Reporting Enhancement project brings new functionality into the existing incident process within IRIS and assists to align IRIS with the recent updates to Directive PNG014 Incident Reporting Requirements. This new functionality enhances the reporting process for incidents and introduces a new *Incident Management Application*.

#### What has changed?

The highlights of what has changed in IRIS as a result of this release are noted below.

**Note:** Whether a user has access to the functionality or enhancements outlined in these 9.23.1 Release Notes depends on the individual’s security access and assigned permissions sets.

#### Incident Reporting

- There are now three different incident versions depending on when an incident was reported to ER. **Legacy** incidents remain as incidents reported pre-IRIS November 2015. The **Legacy 2025** version applies to any incident reported to IRIS between November 2015 and January 21, 2026. The **Current** incidents are any incidents reported after the release of the Incident Reporting Enhancement project. The reporting enhancements deployed under this project are only applicable to incidents entered after January 21, 2026, with a version of Current. Legacy and Legacy 2025 incidents will continue to use the reporting functionality that existed prior to this project. New incident statuses have been introduced for incidents reported after Jan 21, 2026: Open Pending 90 Day Incident Detail, Long Term Management, Vegetation Establishment, Closed-Pending Rec/Rem at Final Abandonment, Closed.
- Initial incident reporting includes additional disclosure questions with the ability to disclose if the incident is exempt from 90 day written reporting as per Directive PNG014. The Substance and Source info tabs are now available at the initial reporting stage to report the estimated

released volumes, size of impacted area and the source licence to meet Directive PNG014 reporting requirements.

- New functionality allows for additional stakeholder contact information to be reported through the Contact Info tab where any additional stakeholder contact added will be kept confidential to the responsible BA and Ministry.
- The Surface Info tab will now validate the coordinates of the incident origin with the LLD provided to ensure accurate location reporting. This tab also contains new additional disclosure questions regarding migratory birds and fish bearing waterbodies that may require the BA to make additional contact with other agencies.
- The Substance Info tab now contains the ability to report the percentage of impacts on and off the operating area. The substance types have been amended to allow for additional substance types to be reported.
- The Source Info tab has been updated to include new incident causes with a primary and secondary category to further accurately break down the cause. Pipeline and flowline incidents have a corrective and preventative action section which will allow for reporting what steps will be taken.
- Incident reporting now includes a section called 90 Day Detail Info. This section allows users to directly disclose the incident status at 90 days if it requires additional management beyond 90 days or can be closed. If an incident is to remain open beyond the 90 day reporting period, users are able to disclose if the incident belongs in Long Term Management or Vegetation Establishment as discussed in the Directive.
- The project enhancements allow for continuous reporting on incident remediation and reclamation through a new Incident Management Info tab in the incident maintenance view. Depending on the status of an incident (Long Term Management or Vegetation Establishment), different sections will be available and allow for the submission of Long-Term Management Reports and Vegetation Establishment Reports. Additional disclosure questions become available at this time to allow an incident to move between statuses or to progress towards closure.
- The closure process of incidents has been enhanced with new disclosure questions to allow the user to disclose if the incident will require additional remediation or reclamation at the time of final abandonment, if remediation and reclamation for the incident closure have been completed or if the incident can be closed with impacts remaining with ER authorization. Any authorization linked to the closure will appear in this section.
- Ministry users with appropriate permissions will have the ability to re-open closed incidents that were initially reported after January 21, 2026, to a status of Long Term Management or Vegetation Establishment. A notification will be sent to the responsible BA of an incident when it is reopened by the Ministry.
- Additional incident obligations have been added that include Submit Annual Report, Submit Pipeline Investigation Report and Submit Root Cause Analysis.
- The incident view includes a summary of all new sections and disclosure questions answered throughout the life cycle of an incident.

## **Incident Management Application**

- A new generic Incident Management Application is available to facilitate authorizations required to leave impacts in place as per Directive PNG014 or for any other application associated with an incident. The new application will require the correct incident ID be provided, and an application document be attached for review. A new Associated Entities tab is included on the incident view to display authorizations associated with the incident.

## **The Saskatchewan Upstream Oil and Gas IRIS Incident Report**

- The Saskatchewan Upstream Oil and Gas IRIS Incident Report has been updated to include a new incident version column, replacing the existing Legacy Incident column, as well as introduces additional columns for many of the new fields and disclosure questions answered for an incident. All columns that have become only applicable to Legacy 2025 incidents will remain in the report to ensure existing data remains available but will return no value for Current Incidents.

### Security and Permission Sets

The following changes were made to listed IRIS permission sets.

**\*Note:** If a user is already assigned to the below permission set, they will automatically receive access to the new function.

## Incident Reporting Enhancement Project

### Industry

Permission Sets **		
Permission Sets ADDED **	Permissions	Function
<b>I.INF.IncidentManagementApplications.Administrator</b>	<ul style="list-style-type: none"> <li>Infrastructure.Base</li> <li>Infrastructure.GenericAuthorization.View</li> <li>Notification.User.Preferences.Maintain</li> <li>Notification.View</li> <li>Shared.WorkItem.Notifications.All.Receive</li> <li>Shared.WorkItem.View</li> <li>WFI.Application.Base</li> <li>WFI.Application.INCIDENT_APP.Administrator.Industry</li> <li>WFI.Application.INCIDENT_APP.Applicant</li> <li>WFI.Generic.Application.Attachment.Update</li> <li>WFI.Notification.RP_CRED_APP.Receive</li> <li>WFI.Notification.RP_CRED_DEN.Receive</li> <li>WFI.Notification.RP_TRAN_APP.Receive</li> <li>WFI.Notification.RP_TRAN_APP_BA.Receive</li> <li>WFI.Notification.RP_TRAN_DEN.Receive</li> <li>WFI.Notification.WFIAPPLAPPROVED.Receive</li> <li>WFI.Notification.WFIAPPLDENIED.Receive</li> </ul>	<ul style="list-style-type: none"> <li>Permission to access the Infrastructure Application - primarily used for menu item.</li> <li>Ability to view a generic authorization</li> <li>Capability to maintain your notification preferences.</li> <li>Capability to view and search for notifications.</li> <li>Ability to Receive</li> <li>Ability to view Work Items.</li> <li>Permission to see 'Applications' menu item.</li> <li>Industry Administrator for 'Incident Management Application'.</li> <li>Ability to work on Incident Management Application records within the system</li> <li>Permission to start the Generic Application - Attachment Update Work Items</li> <li>Ability to receive notifications of type 'Royalty Credit Application Approved'</li> <li>Ability to receive notifications of type 'Royalty Credit Application Denied'</li> </ul>

## Permission Sets \*\*

Permission Sets ADDED **	Permissions	Function
	<ul style="list-style-type: none"> <li>WFI.Notification.WFIAPPLSUBMITTED.Receive</li> </ul>	<ul style="list-style-type: none"> <li>Ability to receive notifications of type 'Royalty Transfer Application Approved'</li> <li>Ability to receive notifications of type 'Royalty Transfer Received'</li> <li>Ability to receive notifications of type 'Royalty Transfer Application Denied'</li> <li>Ability to receive notifications of type 'WFI Application Approved'</li> <li>Ability to receive notifications of type 'WFI Application Denied'</li> <li>Ability to receive notifications of type 'WFI Application Submitted'</li> </ul>
<b>I.INF.IncidentManagementApplications.Applicant</b>	<ul style="list-style-type: none"> <li>Infrastructure.Base</li> <li>Infrastructure.GenericAuthorization.View</li> <li>Notification.User.Preferences.Maintain</li> <li>Notification.View</li> <li>Shared.WorkItem.Notifications.All.Receive</li> <li>Shared.WorkItem.View</li> <li>WFI.Application.Base</li> <li>WFI.Application.INCIDENT_APP.Applicant</li> <li>WFI.Generic.Application.Attachment.Update</li> <li>WFI.Notification.RP_CRED_APP.Receive</li> <li>WFI.Notification.RP_CRED_DEN.Receive</li> <li>WFI.Notification.RP_TRAN_APP.Receive</li> <li>WFI.Notification.RP_TRAN_APP_BA.Receive</li> <li>WFI.Notification.RP_TRAN_DEN.Receive</li> <li>WFI.Notification.WFIAPPLAPPROVED.Receive</li> <li>WFI.Notification.WFIAPPLDENIED.Receive</li> <li>WFI.Notification.WFIAPPLSUBMITTED.Receive</li> </ul>	<ul style="list-style-type: none"> <li>Permission to access the Infrastructure Application - primarily used for menu item.</li> <li>Ability to view a generic authorization</li> <li>Capability to maintain your notification preferences.</li> <li>Capability to view and search for notifications.</li> <li>Ability to Receive</li> <li>Ability to view Work Items.</li> <li>Permission to see 'Applications' menu item.</li> <li>Ability to work on Incident Management Application records within the system</li> <li>Permission to start the Generic Application - Attachment Update Work Items</li> <li>Ability to receive notifications of type 'Royalty Credit Application Approved'</li> <li>Ability to receive notifications of type 'Royalty Credit Application Denied'</li> <li>Ability to receive notifications of type 'Royalty Transfer Application Approved'</li> </ul>

Permission Sets **		
Permission Sets ADDED **	Permissions	Function
		<ul style="list-style-type: none"> <li>• Ability to receive notifications of type 'Royalty Transfer Received'</li> <li>• Ability to receive notifications of type 'Royalty Transfer Application Denied'</li> <li>• Ability to receive notifications of type 'WFI Application Approved'</li> <li>• Ability to receive notifications of type 'WFI Application Denied'</li> <li>• Ability to receive notifications of type 'WFI Application Submitted'</li> </ul>

Permissions **		
Existing Permission Sets	Permissions ADDED **	Function
<ul style="list-style-type: none"> <li>• I.INF.Incident.Submit</li> </ul>	<ul style="list-style-type: none"> <li>• Infrastructure.Notification.INCIDENT_REOPENED_1.Receive</li> <li>• Infrastructure.Notification.INCIDENT_REOPENED_2.Receive</li> <li>• Infrastructure.Notification.INCIDENT_REOPENED_3.Receive</li> <li>• Infrastructure.Notification.INCIDENT_REOPENED_4.Receive</li> <li>• WFI.Application.INCIDENT_APP.Applicant</li> </ul>	<ul style="list-style-type: none"> <li>• Ability to receive notifications of type 'Incident Reopened (Lloydminster)'</li> <li>• Ability to receive notifications of type 'Incident Reopened (Kindersley)'</li> <li>• Ability to receive notifications of type 'Incident Reopened (Swift Current)'</li> <li>• Ability to receive notifications of type 'Incident Reopened (Estevan)'</li> <li>• Ability to work on Incident Management Application records within the system</li> </ul>
