Query Claim

The **Query Claim** function is used when additional information is required for a claim, or when a claim needs to be recovered after it has been submitted to Medical Services Branch (MSB). There are two types of queries:

Claim Query

Use this option when a claim needs to be recovered. For example:

- If incorrect information was entered on claim submission,
- The claim was billed in error, or
- For Workers Compensation Board (WCB) purposes.

Once the claim has been recovered, if required, the claim can be resubmitted with the correct information.

Supplementary Claim Information

Use this option to add supporting documentation to a claim or for a special request. For example:

- When requested to provide additional information (e.g., OR report),
- To appeal for reassessment of a claim, or
- Request a time limit extension.

Query and Claim Status

A claim can also be queried to determine:

- The status of the claim – determine if it is paid, pending, or rejected.
- The status of a query – determine the status of the query.

1. Click on **Query Claims**.

2. Enter the following:

- CPS 10-digit claim number **OR** the Health Card Number
- Province of Health Card Number (defaults to SK)
- Associated Billing Number and Group ID combination
