Notes:

- ◆ Most of these procedure are performed by gynaecologists.
- ◆ 16% of all hysterectomies reported over this time period were categorized as cancer surgeries. Only cancer surgeries are included in this table. The types of cancer for which this procedure is most commonly done are cervical cancer, cancer of the endometrium
- ◆ 60% of hysterectomies reported here were categorized with a diagnosis-based priority of four weeks or less. The remainder have a diagnosis-based priority of six weeks or longer. Emergency procedures are excluded.
- ◆ Time periods where patients specify that they are unavailable for surgery are subtracted from the wait time.
- ◆ Postponed cases are included, regardless of whether the reason for postponement is patient or system related.
- ◆ The results are based on the Jul 19, 2026 refresh of the Saskatchewan Surgical Patient Registry data mart and are subject to minor changes as data is added or corrected.
