Final Report of Seismic Exploration

To be submitted to the Ministry of Energy and Resources: one original print of a 1:50,000 scale final map, shot point map, the notice of completion form and a copy in tabular format showing the ground elevation, location and all pertinent recording location information pursuant to The Seismic Exploration Regulations, 1999, within 60 days after completion of the seismic survey.

(If the survey was conducted for more than one client, a separate final report and map must be submitted for each client.)
