

Industry Tip

Multiple Attachments usage on Obligations

Date	Module/Application/Functionality	Notes
June 5, 2019	Well and Facility Infrastructure	5.20 Release

The Government of Saskatchewan has enhanced the attachment process to allow multiple attachments to be added at the same time. It has come to our attention that the implementation of this enhancement may cause the inadvertent fulfillment of Obligations, which require both metadata and document to fulfill the Obligation, when the document alone is uploaded. This issue has been reported and will be addressed in a future release. In the interim, and to avoid possible penalties for non-compliance, documents which require metadata as part of Obligations fulfillment should be uploaded individually and not be included in a multiple document upload.

This will include:

- Logs
- Drill Stem Tests
- Fluid Analysis
- Core Analysis
