

Industry Tip

Ministry of Environment Obligations on Well Licences

Date	Module/Application/Functionality	Notes
June 5 th , 2019	Well and Facility Infrastructure	5.20 Release

The Government of Saskatchewan has enhanced the Well Licence Application process to add functionality for Ministry of Environment to include their obligations within IRIS. Introduction of this functionality will eliminate the Environment approval letter that is currently attached.

There are two different types of Environment obligations that can be added to the licence as required;

- Ministry of Environment Approval Obligations; and
- Ministry of Environment Aquatic Habitat Protection Permit (AHPP) Obligations.

Moving forward, each of these will be included, if required, in the downloadable PDF of the approved licence available in IRIS. The information will also be available on the 'Obligations' tab on the approved well within the Ministry of Environment section.

Approval Obligations

- 343163 The project is to be under any addendums.
- 343160 Obligations issued under this licence will supersede any commitments made in the project proposal.
- 343166 A copy of this licence must be available on site and all employees and contractors working on this project must be familiar with the licence obligations.
- 343161
- 343170 Monitoring requirements may be amended in consultation with the Ministry of Environment Ecological Protection Specialist.
- 343171 The monitor will provide the Ministry of Environment with an As-Built report upon completion of this project. The As-Built will be completed in accordance with SPIGEC 7 - Guidelines for the Preparation of Environmental As-Built Reports.
- 343172 This is a manual one added in TEST

 Indicates obligation has an associated attachment. See the IRIS obligation for details

Ministry of Environment Aquatic Habitat Protection Permit

Permit Information

Expiry Date: 2020-05-16

Location(s)

12-24-015-04W2

Permit Obligations

- 343177 Pursuant to Section 38(5) of Environmental Management Protection Act (EMPA), 2010 and Section 6 of the EMPA (General) Regulations the licence holder is hereby authorized by the Ministry of Environment to proceed with the proposed project, subject to the following conditions:
- 343182 The project is to be undertaken in the manner described in the project proposal and any addendums.
- 343174 Obligations issued under this permit will supersede any commitments made in the project proposal.
- 343178 A copy of this permit must be available on site and all employees and contractors working on the project must be familiar with the permit obligations.
- 343183 Prompt and effective stabilization of disturbed areas is required as soon as possible after construction. Emphasis will be on a rapid return to pre-development conditions. Erosion control should be consistent with the erosion hazard and may need to precede re-seeding. Mechanical erosion/stabilization control measures may be required until sufficient vegetation is re-established.
- 343179 Spill kits, absorbent matting and drip trays must be utilized on site.
- 343188 Erosion and sediment control measures will be utilized as required to prevent the migration of silt and contaminants into any adjacent river, stream, lake, creek, marsh or other watercourse or water body.

 Indicates obligation has an associated attachment. See the IRIS obligation for details

For the AHPP Obligations, a land location will be entered and an expiry date provided. Please note, that the expiry date for the AHPP may differ from the one-year licence expiry date.
