

# **Industry Tip**

# **Submission Penalties for 90 day Detailed Incident Information**

Date	Module/Application/Functionality	Notes
December 04, 2019	Well and Facility Infrastructure	6.03 Release

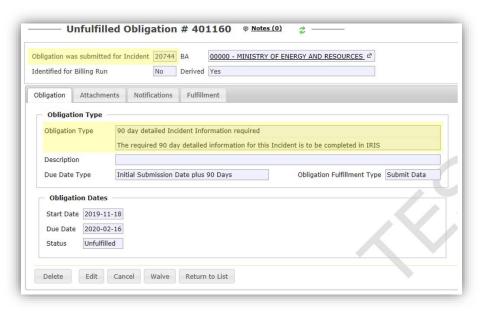

## **Background**

The *Oil and Gas Conservation Regulations, 2012* enable the Ministry to assess non-compliance penalties for unfulfilled incident data submission obligations. Part III, Table I of the *OGCR* indicates all information required to be submitted pursuant to *Directive PNG014: Incident Reporting Requirements* may be subject to a penalty of \$100 per day for each submission or filing that is not submitted by the required date or is deficient.

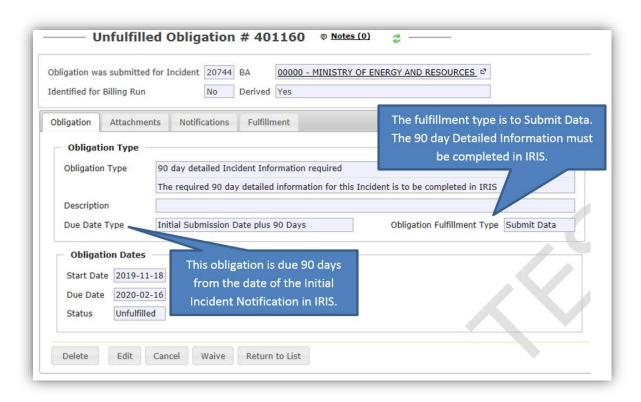

PNG 014 Incident Reporting Requirements outlines the time frame for submission of the 90 Day Detailed Incident Information and requires this information to be completed in IRIS within 90 days after submission of the initial incident report notification.

### **Process**

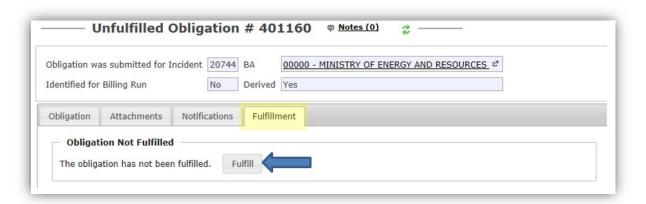

IRIS will notify the user of the 90 day deadline for detailed information at the time of submission of the Initial Incident Notification. IRIS will automatically assign an obligation to an incident once the user submits the Initial Incident Notification in IRIS. Obligation Type – 90 Day Detailed Incident Information Required.

Fulfillment of this obligation will require the user to submit required data to complete the 90 day Detailed Incident Information in IRIS for the subject incident.

Navigating to the fulfillment tab in the obligation will direct the user to the subject incident for the purposes of completing the required data.

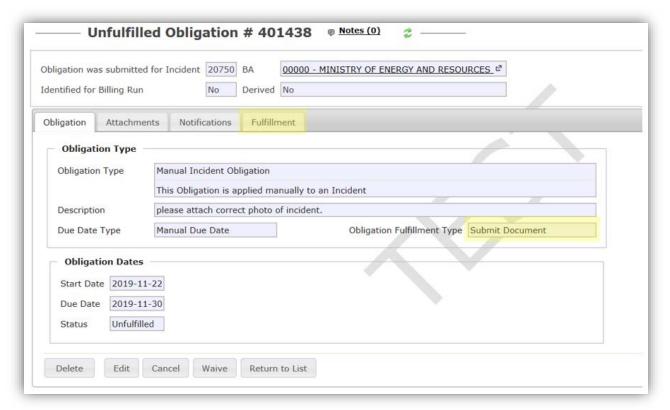

Navigating to the Incident View Screen will also provide the user with access to the "Obligations" tab in order to view and fulfill the obligation.

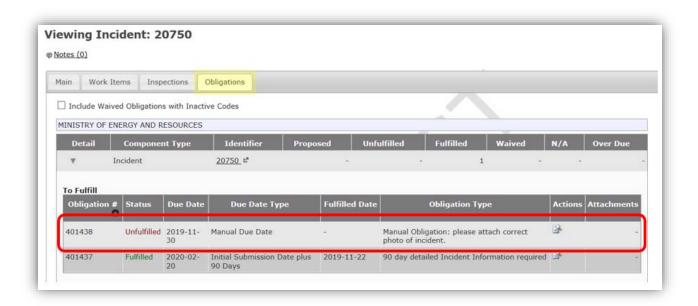

Industry may apply for a Waiver of the obligation under certain circumstances which will allow the Ministry to reassess the penalty. A manual obligation may be applied to the Incident in this case in order to ensure the Ministry obtains the required 90 day Detailed Incident Information.

#### **New Manual Incident Obligation**

A manual incident obligation has been developed for Ministry to request documents, photographs, reports or other infomation pertaining to an incident. This type of obligation may have an Obligation Fulfilment Type of Submit Document.

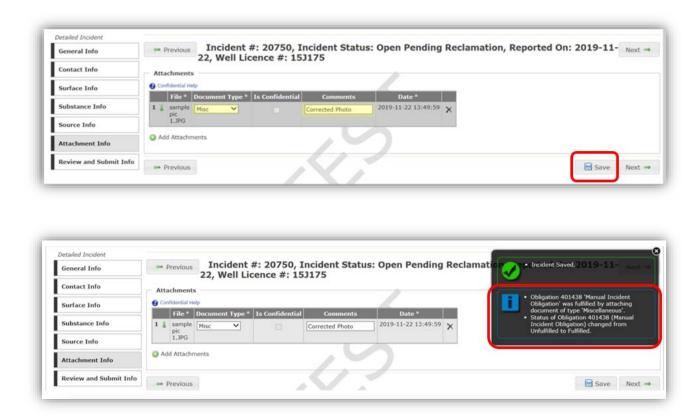

Fulfillment of a manual incident obligation requiring Submit Document as an obligation fulfillment type **must** be fulfilled with the document type of **Misc** regardless of what the document is (photos, report etc.).

The system will redirect the user to the Incident in order to attach the document using the "Misc" document type. This action will fulfil the obligation.
