

## 7.5 Release Notes

---

### IRIS Version 7.5

**Release Date: February 3, 2021**

7.5 Release Notes Publication Date	Notes and Changes Made
February 3, 2021	Initial Release

### About

IRIS Version 7.5 Release implemented 20 items and included enhancements to the Facility Licence Advanced Search, the Good Production Practice (GPP), and the Retroactive Pipeline Licence Application process. A new 'Under Investigation' Incident flag has been introduced. Two new Security Reports were added, along with a new Status column for assigned users. As well, various enhancements and fixes to known defects have been implemented to the Infrastructure, Petroleum Tenure and Invoice Modules.

### What's changed?

The highlights of what's changed in IRIS as a result of this release are noted below.

**Note:** Whether a user has access to the functionality or enhancements outlined in these *7.5 Release Notes* depends on the individual's security access and assigned permissions sets.

### Infrastructure Functionality

- An enhancement has been implemented where additional search criteria has been added to the Facility Licence Advanced Search screen.
- An enhancement has been implemented where an authorization for GPP can be entered on a licence application. This will allow for an Allowable Rate of Production - GPP to be assigned to a new completion when the licence is issued. The licence application must only use a GPP authorization that is valid for the proposed well completion's drainage unit/area and pool. Please see Tip [here](#).
- Added additional denial feedback for the applicant to the Retroactive Pipeline Licence Application process.
- Functionality will allow a Ministry user with the applicable permission set to manually set a flag on an incident called "Under Investigation". If an "Under Investigation" flag has been placed on

an incident, IRIS will restrict specific detailed incident information from BA's that are not responsible for the incident and public view until the investigation has been completed and the flag has been removed by Ministry. The reporting BA responsible for an incident flagged as "Under Investigation" will retain the ability to view and report the required incident details as well as fulfill incident obligations as per Directive PNG014.

## Security Module

- New Security Reports have been developed to further assist SAs to manage user access. The *Disable Users by Organization* report provides historical data for Disabled Users and Enabled Users between a date range. The *Historical Report for New Roles Added* provides historical data for Roles and Permission Sets added or removed.
- A new *Status* column has been added to the *Assigned Users* tab for each Permission Set. The current status of a user is displayed, either *Inactive* or *Active*.

## Security and Permission Sets

The following changes were made to the following IRIS's permission set.

**\*Note:** If a user is already assigned to the below permission set, they will automatically receive access to the new function.

### Industry

Permissions **		
Permission Sets	Permissions ADDED **	Function
I.INF.RoyaltyProjects.View	<ul style="list-style-type: none"> <li>▪ Shared.Notification.ROYALTYCREDITPROJECTSTARTING.Receive</li> <li>▪ Shared.Notification.ROYALTYCREDITPROJECTSUBMISSIONDEADLINE.Receive</li> </ul>	<ul style="list-style-type: none"> <li>▪ Ability to receive notifications of type 'Royalty Credit Project Starting'</li> <li>▪ Ability to receive notifications of type 'Royalty Credit Project Deadline for Submission'</li> </ul>
I.Security.Reports.OrganizationAdmin.All	<ul style="list-style-type: none"> <li>▪ Security.Reports.DisabledSecurityUser_ByOrganizationId</li> <li>▪ Security.Reports.HistoricalNewSecurityProfileRoles_ByOrganizationId</li> </ul>	<ul style="list-style-type: none"> <li>▪ Gives all rights to portal Disabled Security User Information</li> <li>▪ Gives all rights to portal Historical New Roles Report</li> </ul>
