	Subtotal	\$0.00
	TOTAL	\$5,431.62

Overview of Travel and Objectives

Federal/Provincial/Territorial (FPT) ministers most responsible for early learning and child care (ELCC) met for the first time to advance shared priorities in early learning and child care. The FPT forum provided an opportunity to meet counterparts from across the country and to learn from each other through sharing of successes and challenges.

A number of successes and challenges were shared by all the provinces and territories (PTs). Ministry officials will be following up with their counterparts in other jurisdictions to also learn and support the work going forward.

Travel Activity

During the meeting Ministers:

- marked the achievements of the past year that have seen meaningful progress made towards high-quality, affordable, flexible, inclusive and accessible ELCC across Canada, recognizing the responsibility of provinces and territories for the design and delivery of ELCC systems;
- noted FPTs are working towards the shared goal of an average \$10-a-day early learning and child care by March 2026, including a 50 per cent reduction in average fees for regulated early learning and child care spaces by the end of 2022;
- noted that federal, provincial, and territorial governments will support the early childhood workforce, increase participation in the workforce, and help give children the best start in life;
- acknowledged that creating new child care spaces is essential to ensuring access to child care for families; and,
- agreed to establish a FPT forum of Ministers Most Responsible for ELCC to continue to meet, share information and advance shared priorities. Quebec will participate in the forum as an observer.

Quebec's Minister of Families, Mathieu Lacombe, shared lessons learned in establishing its affordable and accessible child care system, which marks its 25th anniversary this year. Other provincial and territorial ministers shared their experiences and successes in meeting the unique child care needs of their local communities in their ELCC systems.
