SINP Requirements Related to Professional Status or Licensure

Some occupations in Saskatchewan are regulated meaning there are professional certification requirements or standards that must be met in order to work in these occupations. SINP applicants for the Occupations in Demand (OID) and Express Entry (EE) subcategories intending to work in one of these occupations are required to submit additional documentation that is necessary to complete the assessment of your application.

The SINP will advise you after you apply if your work experience and education matches an occupation that requires additional documents. If the SINP requests additional documentation, the processing of your application will be put on hold until you provide the documents about your professional status. All other Required Documents must be included in your application. If Required Documents are missing from your application, it will be returned. Your application fee will not be refunded.

A nomination from the SINP does not guarantee eligibility for licensure in a regulated occupation. In addition, the professional requirements needed to apply to the SINP do not allow you to work in a regulated occupation unless you have received licensure from a regulatory body in Saskatchewan. You may need to complete additional professional requirements when you arrive in Saskatchewan to become eligible for licensure.

Please see the list below for occupations that require documentation related to professional status or licensure for your SINP application.

All applicants to the OID and EE sub-categories must meet the following education requirements. (Please see the OID and EE webpages for more information).

- Have completed post-secondary education, training or apprenticeship comparable to the Canadian education system of at least one year in length.
- Must have earned a diploma, certificate or degree.

For education obtained outside Canada, you must submit an educational credential assessment (ECA) from a designated organization.

The SINP has specific education qualifications for some occupations, which are outlined in the list below.

This is not an occupation eligibility list. Expression of Interest (EOI) selections are not limited to the occupations in this list.

1. Engineering Occupations and Professional Requirements

National Occupation Classification (NOC)	SINP Requirements Related to Professional Status or Licensure
• 20010 - Engineering managers • 21300 - Civil engineers • 21301 - Mechanical engineers • 21310 - Electrical and electronics engineers • 21320 - chemical engineers • 21321 - Industrial and manufacturing engineers • 21322 - Metallurgical and materials engineers • 21330 - Mining engineers • 21331 - Geological engineers • 21311 - Computer engineers • 21399 - Other professional engineers • 21231 - Software engineers*	Please provide a letter from the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS) showing that your application for registration as an Engineer-in-Training has been approved. Or A letter from APEGS indicating that you have been assigned Confirmatory Exams. *Software Designers must pursue licensure through the Canadian Association of Information Technology Professionals (CIPS).
